NEW QUESTION 304

You need to be notified when Microsoft plans to perform maintenance that can affect the resources deployed to an Azure subscription. What should you use?

- A. Azure Monitor
- B. Azure Service Health
- C. Azure Advisor
- D. Microsoft Trust Center

Answer: B

Explanation:

Azure Service Health provides a personalized view of the health of the Azure services and regions you're using. This is the best place to look for service impacting communications about outages, planned maintenance activities, and other health advisories because the authenticated Service Health experience knows which services and resources you currently use.

<https://docs.microsoft.com/en-us/azure/service-health/overview>

NEW QUESTION 305

What can you use to identify underutilized or unused Azure virtual machines?

- A. Azure Advisor
- B. Azure Cost Management + Billing
- C. Azure Reservations
- D. Azure Policy

Answer: A

NEW QUESTION 306

Your company has an Azure subscription that contains resources in several regions. You need to ensure that administrators can only create resources in those regions. What should you use?

- A. a read-only lock
- B. an Azure policy
- C. a management group
- D. a reservation

Answer: B

Explanation:

<https://docs.microsoft.com/en-us/azure/governance/policy/overview>

NEW QUESTION 307

What should you use to evaluate whether your company's Azure environment meets regulatory requirements?

- A. Azure Security Center
- B. Azure Advisor
- C. Azure Service Health
- D. Azure Knowledge Center

Answer: A

NEW QUESTION 308

You have an azure virtual machine named VM1. You plan to encrypt VM1 by using Azure Disk Encryption. Which Azure resource must you create first?

- A. An Azure Storage account.
- B. An Azure Information Protection policy.
- C. An Encryption Key.
- D. An Azure Key Vault.

Answer: D

NEW QUESTION 309

Your company has a Software Assurance agreement that includes Microsoft SQL Server licenses. You plan to deploy SQL Server on Azure virtual machines. What should you do to minimize licensing costs for the deployment?

- A. Deallocate the virtual machines during off hours.
- B. Use Azure Hybrid Benefit.
- C. Configure Azure Cost Management budgets.
- D. Use Azure reservations.

Answer: B

Explanation:

Azure Hybrid Benefit is a licensing benefit that helps you to significantly reduce the costs of running your workloads in the cloud. It works by letting you use your on-premises Software Assurance-enabled Windows Server and SQL Server licenses on Azure.

<https://azure.microsoft.com/en-us/pricing/hybrid-benefit/>

NEW QUESTION 310

Who can use the Azure Total Cost of Ownership (TCO) calculator?

- A. billing readers for an Azure subscription only
- B. owners for an Azure subscription only
- C. anyone
- D. all users who have an account in Azure Active Directory (Azure AD) that is linked to an Azure subscription only

Answer: C

Explanation:

You don't need an Azure subscription to work with the TCO Calculator.

<https://docs.microsoft.com/en-us/learn/modules/plan-manage-azure-costs/2-compare-costs-tco-calculator>

NEW QUESTION 311

HotSpot

For each of the following statements, select Yes if the statement is true, Otherwise, select No.

Statements	Yes	No
The Microsoft Service Trust Portal can be accessed by using a Microsoft cloud services account.	<input type="radio"/>	<input type="radio"/>
Compliance Manager can be used to track your company's regulatory compliance activities related to Microsoft cloud services.	<input type="radio"/>	<input type="radio"/>
The My Library feature can be used to save Microsoft Service Trust Portal documents and resources in a single location.	<input type="radio"/>	<input type="radio"/>

Answer:

Statements	Yes	No
The Microsoft Service Trust Portal can be accessed by using a Microsoft cloud services account.	<input checked="" type="radio"/>	<input type="radio"/>
Compliance Manager can be used to track your company's regulatory compliance activities related to Microsoft cloud services.	<input checked="" type="radio"/>	<input type="radio"/>
The My Library feature can be used to save Microsoft Service Trust Portal documents and resources in a single location.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 312

HotSpot

To complete the sentence, select the appropriate option in the answer area.

You can view your company's regulatory compliance report from

	▼
Azure Advisor	
Azure Analysis Services	
Azure Monitor	
Azure Security Center	

Answer:

You can view your company's regulatory compliance report from

	▼
Azure Advisor	
Azure Analysis Services	
Azure Monitor	
Azure Security Center	

Explanation:

The advanced monitoring capabilities in Security Center lets you track and manage compliance and governance over time. The overall compliance provides you with a measure of how much your subscriptions are compliant with policies associated with your workload.

<https://docs.microsoft.com/en-us/azure/security-center/security-center-intro>

NEW QUESTION 313

HotSpot

To complete the sentence, select the appropriate option in the answer area.

Azure Container Instances
Azure Reserved Virtual Machine instances
Azure Spot virtual machine instances
Azure virtual machine scale sets

provide access to unused Azure compute capacity at deep discounts.

Answer:

Azure Container Instances
Azure Reserved Virtual Machine instances
Azure Spot virtual machine instances
Azure virtual machine scale sets

provide access to unused Azure compute capacity at deep discounts.

NEW QUESTION 314

HotSpot

For each of the following statements, select Yes if the statement is true, Otherwise, select No.

Statements	Yes	No
Azure DevOps Services allows developers to deploy or update applications to Azure using Continuous Integration/Continuous Delivery (CI/CD) pipelines.	<input type="radio"/>	<input type="radio"/>
Azure DevOps Services includes a Git repository for developers to store code.	<input type="radio"/>	<input type="radio"/>
Azure DevOps Services can be used to build and host web apps.	<input type="radio"/>	<input type="radio"/>

Answer:

Statements	Yes	No
Azure DevOps Services allows developers to deploy or update applications to Azure using Continuous Integration/Continuous Delivery (CI/CD) pipelines.	<input checked="" type="radio"/>	<input type="radio"/>
Azure DevOps Services includes a Git repository for developers to store code.	<input checked="" type="radio"/>	<input type="radio"/>
Azure DevOps Services can be used to build and host web apps.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 315

Drag and Drop

Match the term to the appropriate description. (To answer, drag the appropriate term from the column on the left to its description on the right. Each term may be used once, more than once, or not at all.)

Terms	Answer Area
authorization	Term <input type="text"/> The ability to use the same credentials to access multiple resources and applications from different providers.
multi-factor authentication (MFA)	Term <input type="text"/> The process of identifying the access level of a user or service.
single sign-on (SSO)	Term <input type="text"/> One of several elements required to identify a user or a service.

Answer:

Terms	Answer Area
<input type="text" value="single sign-on (SSO)"/>	The ability to use the same credentials to access multiple resources and applications from different providers.
<input type="text" value="authorization"/>	The process of identifying the access level of a user or service.
<input type="text" value="multi-factor authentication (MFA)"/>	One of several elements required to identify a user or a service.

NEW QUESTION 316

Drag and Drop

Match the cloud computing benefits to the correct descriptions. (To answer, drag the appropriate service from the column on the left to its description on the right. Each service may be used once, more than once, or not at all.)

Benefits	Answer Area
<input type="text" value="Agility"/>	<input type="text" value="Benefit"/> Resources can be provisioned dynamically to meet changing demands.
<input type="text" value="Geo-distribution"/>	<input type="text" value="Benefit"/> Applications and data can be deployed to multiple regions.
<input type="text" value="Scalability"/>	<input type="text" value="Benefit"/> Applications can be developed, tested, and launched rapidly.

Answer:

Benefits	Answer Area
<input type="text" value="Scalability"/>	Resources can be provisioned dynamically to meet changing demands.
<input type="text" value="Geo-distribution"/>	Applications and data can be deployed to multiple regions.
<input type="text" value="Agility"/>	Applications can be developed, tested, and launched rapidly.
